

NL101 ROTATABLE WALL LIGHT

NL101 is a small curved semilune wall lamp with up&down lighting. The lamp body is suspended on the wall, the light gently sweeps over the wall to produce a soft atmosphere. It is equipped with a mounting seat with a dual rotating shaft, which allows the diffuser to rotate 350° to accurately guide lighting to where light is needed. Besides, the diffuser can do upward & downward 30 degree adjustment to shade light, which can meet more personal preference. This lamp has the most personalized and adjustable light source possibility, it is ideally used as a bed lamp. However, its versatility also makes it an excellent solution for residential, office, corridor lighting options.

FEATURES

- Flexible rotary, 350 degree for horizontal direction, 30 degree for vertically direction.
- Exquisite appearance which makes it a decorative artwork.
- Quick install with fast connector.
- Internal flicker free driver.
